Understanding, Communicating, and Correcting Subluxation

This program draws the most current research in science and philosophy with the objective of advancing doctors' impact on patient outcomes. Dr. Tressler achieves this through greater knowledge of chiropractic's safety, effectiveness and certainty in case management.

Research confirms why patients benefit from chiropractic care. Patients are eager to know about the Science and Philosophy of Chiropractic.

Dr. Tressler will show you how to critically evaluate research in chiropractic and how to deliver the message of chiropractic to your patients.

Course Highlights

- Subluxation Degeneration: Pain and Dysfunction
- Long Term Neurological Stress and Dis-Ease
- Exam Process to Focus on the Subluxation
- Adjusting and Rehab- Making the Connection to Each and Every Question and bringing it back to Subluxation Correction
- Correcting Subluxation - Posture, Function, Physiology and Continuing Care

“Postgraduate programs sponsored, co-sponsored or hosted by Sherman College of Chiropractic may not always reflect the view of the college or its employees.”

About the Instructor

Aaron Tressler, D.C. is active throughout the state with chiropractic events. He is very active in using modern social media to get out the chiropractic message and is a board member of the Chiropractic Fellowship of Pa. He also supports the profession by coaching and training chiropractors on philosophy, practice building and communication. He is committed to the further expansion of chiropractic. He continues to practice in suburban Pittsburgh while maintaining his speaking schedule.
