

# Policy of Health Freedom Statement

The Chiropractic Fellowship of Pennsylvania acknowledges that each individual has the UNALIENABLE RIGHT to freely choose and make their own health care decisions.

In that, each individual or guardian, has the right to make INFORMED DECISIONS / CONSENT as to what health care procedures, products and services are right for their particular health history, philosophical beliefs and or specific religion.

Understanding, that every health care procedure, product and service has a RISK / BENEFIT ratio and only the individual can make an informed decision that's right for their individual circumstances.

Regarding vaccines, the Chiropractic Fellowship of Pennsylvania is neither pro-vaccination or anti-vaccination, but rather a supporter of PERSONAL AUTONOMY.

Furthermore, the Chiropractic Fellowship of Pennsylvania respects each individuals FREEDOM OF CHOICE pertaining to healthcare. We are advocates for the unbiased delivery of health care services to ALL people regardless of race, religion or personal philosophy.
